

Mini Converters

The world's greatest converters

Cable tiepoint to lock down the power connection tight

Easily change settings using mini switches located on the side.

Mini USB for adding new television standards or new features.

Easy to use Converter Utility to update and change your settings.

SDI loop through output for connecting to other SDI based devices.

+12V power connection and includes international power adaptor.

Unique redundant SDI input switches automatically when main SDI input is lost.

Super Easy to Use

All Mini Converters are similar, so they're super easy to understand and use. With advanced 3 Gb/s SDI technology, every Mini Converter is fully compatible with your SD and HD equipment, and can be updated via USB. You can even use our Converter Utility to make adjustments right from your laptop.

Includes AES/EBU and Analog Audio

Most Mini Converters feature 24 bit analog and 24 bit digital audio, and HDMI models support HDMI audio. Unlike other converters you don't need custom audio cables, and the standard 1/4 inch audio jacks switch between balanced analog audio or AES/EBU.

High Quality

Mini Converters are built to the highest quality standards with low SDI jitter. You get the longest SDI cable lengths combined with ultra low noise analog video and audio for a true broadcast quality solution.

Hardware Down Converter

If you connect to analog SD equipment then you'll know how hard it is when modern SDI equipment unexpectedly changes between SD and HD. Mini Converter SDI to Analog includes an automatic high quality down converter that supports letterbox, anamorphic 16:9 and center cut 4:3.

New 3 Gb/s SDI Technology

With the latest 3 Gb/s SDI technology built into Mini Converters, upgrades can be loaded via the USB connection for future video format compatibility. 3 Gb/s SDI is also fully compatible with all your SD and HD equipment.

International Power Supply

Unlike other converters, a universal power supply is included with international socket adapters for all countries. To stop power accidentally being disconnected, a cable tie point is included to lock down the power connection tight and secure!
